

Nautilus Hyosung 1800 SE

The new NH-1800 SE, a value leader in the retail ATM industry, offers enhanced performance, security, quality and reliability.

The Challenge

Customers need a convenient place and method to access their own cash without writing a paper check. While ATMs are a good solution, many banks do not have a presence in retail businesses.

Merchants look to a stand-alone ATM program as a method of increasing loyalty, store traffic and sales volume; however, some ATM offerings are complicated and expensive to implement.

The Solution

The new NH-1800 SE, a value leader in the retail ATM industry, offers enhanced performance, security, quality and reliability. In addition, this turnkey solution includes equipment, installation, processing, training, maintenance, reporting and service – a comprehensive program that makes it easy and profitable for you to offer ATM services. Once installed, this on-site ATM will dispense cash to customers, with part of that money likely to be used to make purchases in your store.

Upgraded Features

Faster Processor

The enhanced CPU, along with upgraded software, improves transaction speeds, enhancing the customer experience.

Added Security

The UL® Business Hour Safe has been updated with a more robust locking mechanism, increasing its durability.

Capacity to handle up to 4,000 notes

The upgraded cash dispensing unit provides a variety of cash-dispensing configurations, with a capacity of up to 4,000 notes.
