

MX915 Multimedia Payment Terminal

The MX915 delivers a rich media experience with a powerful processor and generous memory. The terminal is elegantly designed, NFC-enabled and supports full motion video.

REDUCE CHARGEBACKS and fraudulent transactions by accepting chip and PIN payments.

REDUCE IDENTITY THEFT as the customer's card never leaves their possession.

PROVIDES PASSWORD PROTECTION for sensitive transactions, allowing only designated staff access.

PROTECT CUSTOMERS' PAYMENT INFORMATION by masking card information on transaction receipts. Card masking and data truncation on receipts also reduces your PCI scope.

Your customers want a hassle-free shopping experience. While it may not be top-of-mind when they're browsing your store, our solution guarantees that their payment card data is always protected.

SOPHISTICATED, FLEXIBLE INTEGRATED SOLUTION

The integrated MX915 solution can easily integrate to your new or existing POS/ECR solutions.

- Supports a full complement of contact and contactless credit and debit transactions.
- NFC-integrated to capitalize on the increasingly popular smartphone transactions, in addition to supporting chip and PIN payments.
- The 4.3" color display supports full motion video to advertise directly on the terminal—driving new revenue opportunities while enhancing customer interaction.
- Application development is fast and flexible, thanks to its use of the Web Development Environment (WDE).
- Complies with the latest PCI PTS 3.0 standards, as well as EMV Level 1 and 2, Interac, RoHS and WEEE requirements.
