

360Control

360Control is a flexible web based card management system supporting Corporate, Business and Purchasing card needs. 360 Control allows the Issuer to manage and view their card portfolio, and deliver a solution to their corporate and business customers to manage their card programs and monitor their spend.

This service driven solution provides the full value of a flexible online card management system with the advantage of minimal start-up costs and infrastructure investment. Additional services are available including help desk, training services, consulting and customization services.

360Control- key benefits:

Card Management	Real time access to support organisations in the management of their card program including creating new cards , closing cards, changes to credit limits, updating of demographics, ordering replacement plastic and payments.
Compliance & Control	Daily views of spend to ensure complete transparency and early fraud detection.
Transaction Management	Allows users to view and manage all their card and non card (out of pocket and mileage) transactions in one solution.
Merchant Analysis & Reporting	Detailed analysis of merchant spend by MCG/MCC with the ability to create customised merchant group reports. Control of on/off contract spend through the preferred supplier indicators.
Cost Allocation	Default cost coding for each cardholder including the ability for multiple cost allocation systems in the one solution.
Customised Access	Ability to access different levels of information and functionality depending on the role (eg: administrator, manager, cardholder, buyer, audit or reporting).
ERP Integration	Customised extracts with the data you need to ensure accurate reporting in your financial systems. Ability to extract as you require on a daily, weekly or monthly basis.
Online Enquiries & Reports	Useful enquiry filters allowing you to monitor spend on key control elements for your business. Standard enquiries and reports covering cost allocation, transaction lifecycle and merchant analysis.
Receipt Scanning	Ability to hold an image of the receipt for each transaction thereby allowing greater efficiencies in expense management.

360Control

360Control is a modular and flexible solution that can grow to meet your individual client needs

360Control supports your Issuers customers with a range of features that can be tailored for their requirements, whether they are a small business or a large, multinational corporation.
