{Host Communication}

Terminal communicates to host for approval

Tear Now, Press Enter

Tear slip and have customer sign the receipt.
Press **Enter** to print customer receipt.
Press **Cancel** to return to the idle prompt.

ECA Sale
Approval #####

A merchant receipt will print if the sale is approved for ECA. Have the check writer sign the receipt and then press **Enter** to print customer receipt

If check writer sign receipt, the merchant will stamp "VOID" on the front of the check and return the check to the customer and keep the signed receipt for your records

If the check writer refuses to sign the receipt, the ECA transaction has to be "VOIDED" and the merchant should review check for warranty requirements and keep check for deposit.

If no receipt prints, an approval code or response code will be displayed. If approved, write four-digit approval code and TeleCheck subscriber number on check and keep for deposit (be sure to follow all "Warranty Requirements" on back). For non-approved transactions, see "Response Codes" section.

Duplicate Receipt: Use this function to reprint the last transaction or any transaction stored in the terminal's memory.
