

First Data VisionPLUS®

Step up your competitive edge – unlock the value in your account processing portfolio.

VisionPLUS® provides an enterprise account processing platform for your customers' payment cards, loans, pre-paid and commercial card products. Our platform easily integrates with your other systems, to provide a holistic view of your customer account relationships.

Step-up your competitive edge with faster time to market

With simplified technology and service-based architecture that maximises easy roll-out of new products and services.

Ride the latest wave of innovation

By leveraging open APIs for quicker application development and integration.

Take advantage of new revenue generating opportunities

By harnessing creative new solutions from around the world – all in one platform.

Reduce the cost of operating your business

With a new deployment model or infrastructure option that lowers cost per account.

First Data™

First Data VisionPLUS®

Accelerate your platform technology modernisation with full-service architecture, API drag and drop build, and SDK technology simplification – all enabling rapid digital deployment for your customers to self-service their accounts:

Speed to Market

1,000+ API's – Over 1,000 off-the-shelf APIs and a custom API builder eliminates your coding efforts – integrates to external systems faster.

Single Code Deployment – VisionPLUS deploys without installation as a single implementation, improving your time to market. Consolidated edits and cross-edits housed centrally in a single Data Access Layer – reducing your time to make changes.

Auto-Generated UI Displays – User interface displays generated directly from APIs – faster than making green screen changes.

Cost Efficiencies

Less Configuration – Instead of heavy coding, VisionPLUS provides over 2,000 parameters plus a set of utilities to support changes – reducing your development time and costs.

API Framework – Reduces your need to build or maintain additional versions of services.

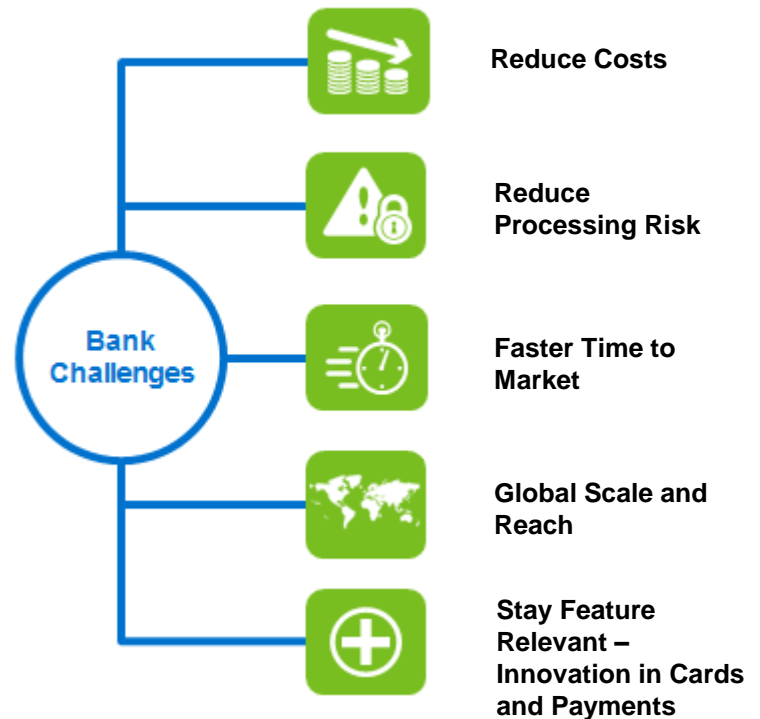

Automated Workflow Solutions – Intuitive UI, rules engine support, and case management capabilities can improve the customer experience while reducing your operating costs.

Feature Relevant

Schemes and Product Options – Adjacent services across the lifecycle meet your need for ongoing service innovation to differentiate your product set – now and future forward

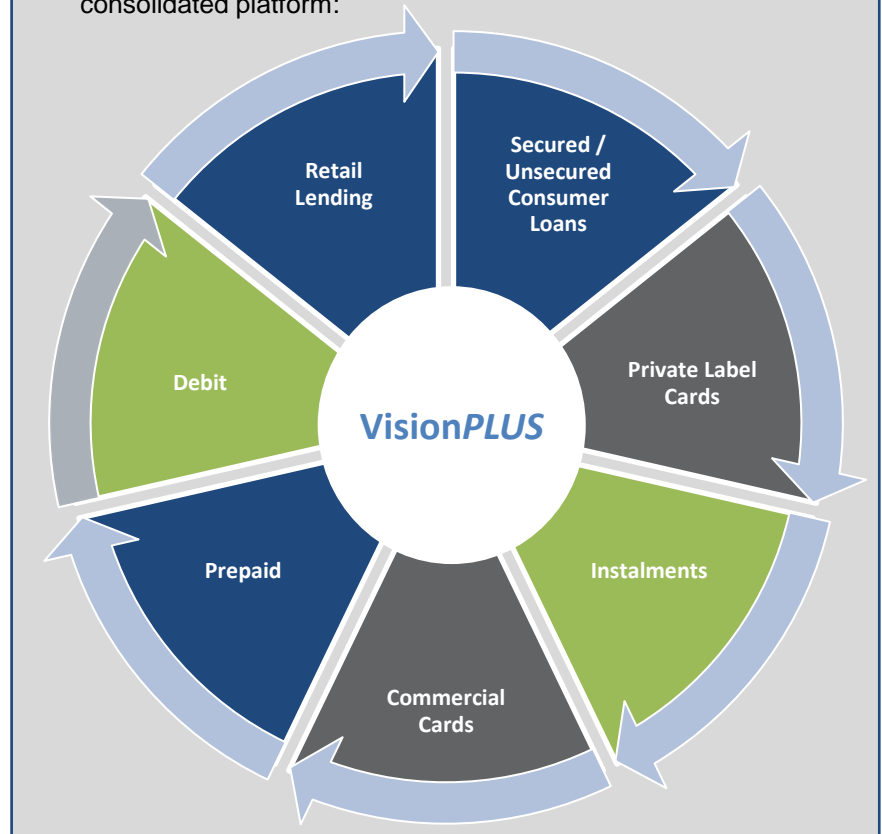

Mobile Payments Support – Solutions for mobile wallet service providers that meet your customers' mobile payment expectations.

Digital Experience – Better engage your customers with real-time self-servicing, event driven communications, and self-service solutions that meet (or exceed) their digital expectations.

A Multi-Product Platform

VisionPLUS supports multiple issuing products on a single, consolidated platform:
