

# First Data Connect Hosted Payment Page

A simple, low cost way to accept online payments.

Knowing consumers today expect to use their credit and debit cards to pay for products and services online, it's imperative that businesses be ready to accommodate them. But for a lot of businesses, the time, expense and hassle of setting up an eCommerce website was simply too much. That's why there's First Data Connect Hosted Payment Page. It lets you integrate a secure payment page for your website with limited technical knowledge and even less set-up time.

## Seamlessly integrated for ultimate customer convenience

The Connect Hosted Payment Page is simple. When a customer is ready to pay, they're automatically redirected to a payment page, hosted by First Data, where they securely enter their payment details. This page is customisable with logo, fonts and colours to retain the look and feel of your website. Once completed customers are returned to your site at the end of the transaction. Customers can pay using their Visa®, MasterCard®, Maestro®, Diners®, Discover®, and American Express® cards.

## Security — and peace of mind — built in

Connect includes MasterCard Secure Code, Verified by Visa and SSL-encryption functionality to help protect you and your customers. As your Connect payment page is hosted securely by First Data, your PCI DSS compliance validation will be simplified.
