

Virtual Terminal

Simply process your transactions from anywhere with Virtual Terminal

With Virtual Terminal, you can conduct business anywhere and safely accept payments with the equipment you have today. No need to purchase additional equipment or have a dedicated system for accepting payments. Simply turn any computer with an internet connection into a POS terminal and begin accepting payments today!

There is no set up, technical knowledge or manual updates required – with minimal training you can simply get on with running your business. We also provide comprehensive reporting and user management functionality.

How it Works

When you are ready to process payments, log into the Virtual Terminal and enter your customer information. Simple, secure and easy to use.

Benefits at a Glance

Virtual Terminal is a web-based application that provides you with all the functionality needed to accept credit card payments from your customers.

- The solution is available online 24/7.
- Easy to use, fast and reliable payment processing where and when you want.
- Keep card information secure.
- Eliminate software installations, upgrades and system maintenance.

Key Features

- Accepts all major debit and credit cards: Visa® and MasterCard®.
- Easy to use, efficient and portable – all you need is a computer and access to the internet to process transactions anytime, anywhere, without the need for paper-based transactions.
- Real-time card processing means you are advised of approval or decline messages at the time of transaction.
- Access comprehensive transaction reports for reconciliation, transaction monitoring and business analysis.
- User management functionality allows you to restrict user access.
- Easy to use online reporting offers convenient access to your payment activity and transaction history.
