

Batch Processing

Batch processing is an easy and efficient online payment solution that allows you to schedule and process large transaction volumes in a single go.

Batch Processing allows you to manage and schedule multiple customer card payments simultaneously by simply uploading a file into the secure Batch Processing portal. All you need is a computer with an internet connection to upload batch files.

This is ideal for businesses processing large numbers of transactions that do not occur in real-time, such as recurring bill payments, memberships or subscriptions.

Batch Processing Solutions

Benefits at a Glance

- Simply log on, upload and process multiple batches of transactions all at once for greater convenience and efficiency.
- All transactions are authorised online, offering a secure and efficient payment solution that can help reduce administration costs.
- Provides full status reporting of the processing batch while ensuring fast reconciliation and better cash flow for your business.
- Eliminate time spent manually completing paper vouchers or manually keying transactions via a POS terminal.
- A secure method of processing your customers' credit card payments.
