About First Data

First Data is a global leader in commerce-enabling technology and solutions, serving more than 6 million merchants around the world — from the smallest businesses to the largest corporations.
Wired POS Terminal

Simple-to-use terminal for accepting card payments in-store

The wired POS terminal is an easy-to-use fixed line terminal. Our fast, secure and reliable POS terminals are contactless-enabled and can be conveniently integrated into your point-of-sale system. It’s an attractive terminal that includes an intuitive colour touchscreen and various connectivity options.

Key Features

- Accepts major debit and credit cards: Visa, MasterCard, UnionPay, JCB and American Express
- Accepts different kinds of payments including contactless (tap), chip cards (insert) and magnetic stripe cards (swipe)
- Instant IP broadband connectivity for faster transaction processing
- Dial-up connectivity option via telephone line as a backup
- Easy to use and includes a backlit screen and keypad for all lighting situations

Ideal for These Types of Businesses:

- Retailers, corner stores, boutique outlets
- Clothing and gift stores
- Grocery stores
- Restaurants, cafes and quick-service restaurants
- Beauty, hair salons and florists
Wireless POS Terminal

A terminal that’s easy to use and easy to carry around

The wireless handheld POS terminal allows you to accept debit and credit payments quickly and securely from almost any location. The portable terminal is ideal for restaurants and bars that lack counter space or that have outdoor seating as well as hospitality, delivery or transportation operations.

It uses 3G technologies to connect to the network which means you’ll be getting the fastest data transmission and more area coverage for your business.

Key Features

• Accepts major debit and credit cards: Visa, MasterCard, UnionPay, JCB and American Express
• Built-in contactless technology
• 3G connectivity for faster transaction processing
• Compact design to fit comfortably in even the most petite hands
• Easy to use and includes a backlit screen and keypad for all lighting situations

Ideal for These Types of Businesses:

• Hospitality
• Restaurants and cafes (Pay-at-table)
• Home and service delivery
• Events/trade shows
• Kiosks and self-service counters
Value Added Services

Realise more benefits with our value-added service via our POS terminal

Contactless Payment

Offer your customers a faster and easier way to pay, saving time for them and reducing queues for you.

Key Features

• Ability to accept transactions that use both contactless cards and mobile payments (such as Apple Pay, Android Pay and Samsung Pay) on the same POS terminal

• Ease of payment by simply tapping a card or mobile on the contactless reader of the POS terminal

Benefits

• Reduce cash-handling and other potential errors

• Process transactions quickly and securely

• Save on costs with easy administration and reconciliation

• Improve customer experience by reducing transaction time and providing greater convenience

Dynamic Currency Conversion (DCC)

Provide a value added service to your international customers and earn additional revenue from international currency fees.

Key Features

• A value added service for your international customers

• Both merchant and customer know precisely the amount of sales value

• Currently available in 48 currencies

• Daily electronic updates of foreign currency exchange rates
Benefits

• Earn additional revenue from international currency fees
• Offer convenience through more payment options
• Increase purchase incentive for international customers
• Improve customer service and increase customer loyalty

Instalment Payment Plan

Offer your customers an easy and affordable way to indulge in their shopping pleasures and large-ticket items with ease. This plan is ideal for driving large-ticket items such as watches and jewellery, travel and hospitality, consumer electronics, furniture, medical etc.

Key Features

• Minimal setup required as it uses your existing First Data POS terminal
• Automated bank instalment payment plan processing via a single POS terminal
• Offers bank instalment via a single POS terminal to free up space at counters for POS displays
• Automated processing helps to reduce fraud exposure and protect cardholder information

Benefits

• Boost large-ticket sales as customers are able to make their purchases easily and more quickly
• Enhance customer satisfaction and drive repeat high-value business with flexible plans from six months to 36 months and interest rates as low as 0%
