

SAP® Digital Payments Add-On Integration

To set up the connection between the SAP digital payments add-on and SnapPay, you select SnapPay as your payment service provider (PSP) using PSP Status UI.

The URLs to access PSP Status UI have the following formats:

Test account

<https://<subdomain>.demo-digitalpayments-sap.cfapps.eu10.hana.ondemand.com/pspStatus/index.html>

Production account

<https://<subdomain>.digitalpayments-sap.cfapps.eu10.hana.ondemand.com/pspStatus/index.html>

Note

- Replace the placeholder <subdomain> with the subaccount you created in the account setup procedure.
- The URL is case sensitive.
- The user interface is only available in English.
- Using the relevant URL, log on to the **PSP Status UI** with the appropriate credentials.
- Right click on SnapPay and click on “activate” option.
- The status will change to “active” from “inactive”.
- Contact Fiserv SnapPay team at SnapPayDPSupport@firstdata.com to link your merchant account for credit card processing.
